Dear Hiring Manager,

I am a recent graduate from STI college Batangas with a degree in Bachelor of Science in Information Technology and I am writing to apply for the Web Developer position at Google Company. During my studies, I worked on web development projects where I learned how to build basic applications and systems, manage databases, and solve technical problems specifically in terms of security.

I am excited to apply what I have learned especially with my skills, determination, and capabilities to support and dedicate my hardworking trait to the team. In my academic works, I created user-friendly web interfaces and worked with my classmates to deliver tasks on time. I am confident with my ability to learn new things, adapt to changes, and contribute to Google Company.

Thank you for taking the time to review my application. I would welcome the opportunity to discuss in an interview how my background and willingness to learn make me a good fit for the Google Company.

Sincerely,

Navarro, Nicolas Orven B.
